ABOUT ME

I am a very energetic and active person. In the past I followed many different activities simultaneously: university courses (mandatory ones and extras that I found interesting), sports, language courses, the development of a startup and, of course, free time. I learnt how to organize and plan efficiently my duties and to control and overcome stress. Working in a startup for more than six years and collaborating as a Tutor, has given me the possibility to learn how to work in a team and get along with people at work.

INTERESTS AND NOT-SCIENTIFIC ACTIVITIES

JULY 2014 - Today

FOUNDER and CAO of **Artupia**
see: <http://www.artupia.com>

In 2014 I started working with two dear friends at a Startup, Artupia, on the algorithm side as CAO. All this has led to a solid group work, to learn new tools never used before for image creation and social management, to learn how to code in different programming styles and to learn the basics of marketing and design.

2012 - 2015

MEMBER and EVENTS COORDINATOR of the Highschool Club **Europeanclubeuropo**.
